

EPS Pumps keeps the planes flying at Glasgow.

European Pump Services (EPS Pumps) Ltd completes a major re-fit programme at Glasgow Airport.

From calculation selection, to specification, to assembly and supply, we worked side by side with EPM Solutions of Paisley to provide Pentland Aviation (GLA) with an up to date pump package of 4 off Bridger offloading pumps and 4 off Refueller loading pumps.

From our own range of ATEX Ex pumps coupled to 18.5kW motors with an offload and loading rate of **2200 l/min** the programme of installation and commission was text book smooth from start to finish.
